ELEVATE INDUSTRY SERVICE

Parts Technician

The heavy-duty industry doesn't need another repair shop.

It needs better companies.

Companies that value thinking as much as turning wrenches. Companies that communicate clearly. Companies that use technology to improve service instead of adding complexity. Companies that understand every decision has a ripple effect.

That's why Mach 6 exists.

Our vision is to elevate industry service and accelerate fleet performance. Our mission is to maximize customer uptime through smarter service by combining technology, proactive communication, and disciplined process control.

If that sounds like the kind of company you want to help build, we'd like to meet you.

YOUR ROLE

As a Parts Technician, you'll do more than pull parts. You'll keep the whole shop moving. The right part, at the right time, with accurate documentation, is what turns a diagnosis into a repair — and a repair into uptime. Our technicians, service advisors, and customers all depend on the precision of your work.

At Mach 6, a part isn't just inventory. It's a commitment to a timeline, a customer, and a piece of equipment that needs to get back to work.

WHAT YOU'LL WORK ON

- Parts lookup, sourcing and ordering for heavy trucks and equipment
- Receiving, stocking and inventory control
- Supporting technicians at the counter and in the bays
- Coordinating parts timelines with service advisors
- Building supplier and distributor relationships
- Pricing, quoting and margin accuracy
- Cores, warranty parts and returns — tracked and closed out
- Keeping the parts room organized and audit-ready

WHAT WE BELIEVE

- Every decision either multiplies value or multiplies waste.
- Technology should amplify good people—not replace them.
- Documentation is part of the repair.
- Clear communication builds trust.
- Disciplined systems create predictable results.
- Quality and profitability improve together when work is done properly.

WHAT SUCCESS LOOKS LIKE

- Deliver the right part the first time.
- Keep inventory counts you can trust.
- Document clearly.
- Communicate timelines honestly.
- Follow proven systems.
- Help teammates succeed.

- Take ownership of customer outcomes.
- Continuously improve your skills.

QUALIFICATIONS

- Experience in heavy-duty, agricultural or industrial parts
- Journeyman Parts Technician or Apprentice an asset — not required
- Accuracy and attention to detail under pressure
- Comfortable with parts catalogues, inventory software and digital tools
- Professional communication skills
- Mechanical curiosity and willingness to learn

WHY MACH 6

We are building a company that raises the standard for heavy-duty service.

You'll work with modern inventory technology, digital processes, structured systems, continuous training, leadership development, and a team committed to improving every day.

We're not interested in doing things because they've always been done that way. We're interested in finding better ways.

BENEFITS

- Extended health care
- Vision care
- Dental care
- RRSP match
- Boot allowance
- Life insurance
- Disability insurance
- Vacation
- Company Functions

If you're looking for another parts counter job, we may not be the right fit.

If you want to become part of a team that values accuracy, clear thinking, ownership, technology, and continuous improvement, we'd love to hear from you.
